and Irrigation District

Supply Canal Water Adventure's

Central's Supply Canal runs from just east of North Platte to east of Lexington. Many sections of the canal wind through high banks, and narrow canyons. The 75-mile-long Supply Canal and its many canyon lakes are used for hunting, hiking, canoeing and kayaking, camping and fishing. Only wakeless boating is allowed on the canal to prevent bank erosion. The public is permitted to use the entire length of the canal for recreational purposes, excluding areas around Central's three hydroelectric plants and NPPD's Canaday Steam Plant.

RECOMMENDED AREAS TO PUT IN:

North Platte Confluence

From here, you will have to navigate a flume, two checks, and some very low clearance bridges before you pass Tobey's Check to get on a long stretch of canal with no obstacles.

Google Maps Link: <https://goo.gl/maps/ix3JDzbr5NrD6eWL7>

Tobey's Check

Parking available on the north, then walk across the check to the launch point on the south.

*** It is NOT RECOMMENDED to get any closer to the gates as there's a strong eddy.*

Cottonwood Canyon

Launch point just south of the bridge on the west side of the road. Anywhere here is typically safe.
